

## SEPTEMBER IS CHIARI AWARENESS MONTH

*Through Research, Hope:*

**THANKS** to the hard work of our volunteers and the generosity of thousands, the Conquer Chiari Research Center is a busy place. Currently, actively working on projects we have: 10 faculty professors, 2 full-time post-docs, 8 graduate students, and 2 undergraduate students. That's **22 BRILLIANT PEOPLE** working diligently to improve the experiences and outcome of Chiari patients. We are planning on providing an extensive research update to the community, with many interesting results, in either December or January.
