

## CONQUER CHIARI WITH EVERY STEP

**Conquer Chiari is excited to announce that we have funded two new, exciting research projects!**

First is a **\$50,000 grant** to Dr. Bhadelia, a neuroradiologist at Harvard, who will essentially build a clinical version of the Chiari 1000 database. The database will be used to explore the physical mechanisms underlying common Chiari symptoms such as cough headache, dizziness, and numbness/tingling.

Second is a **\$35,000 grant** to a neurosurgical group at Ohio State University who will use advanced MRI to examine the microstructure of the brain and upper spinal cord of Chiari patients and see if this type of scan is useful in deciding who will benefit from surgery.

**As always, projects like these are only possible thanks to our donors and volunteers.**

**PLEASE GET INVOLVED! ★ [WWW.CONQUERCHIARI.ORG](http://WWW.CONQUERCHIARI.ORG)**
